

Digsee SURE

From budget mobile to modern Tablet PCs or notebooks. In the office, at a meeting with customer/respondent, on-the-go.

COST EFFECTIVE READY-TO-USE SOLUTION FOR MOBILE FORMS CREATION / ENTRY / PROCESSING

Today one can hardly name an industry, where employees do not have to fill in numerous forms, reports, and questionnaires, often while on-the-go. At the same time conventional data collection methods that use paper forms are rather cost / time-consuming and lacking accuracy.

DigSee Ltd presents SURE (SUrvey Results Entry) solution that enables it to eliminate paperwork, increase productivity and access data faster using modern emerging technologies such as mobile computing platforms and wireless data transfer. DigSee SURE is a turnkey solution that is easy to install, deploy, and use.

DigSee SURE can be effectively used in the following areas:

- Market Surveys
- Sociological Surveys
- Merchandising
- Insurance
- Manufacturing
- Mobile Staff Control
- Pharmaceutics/Healthcare
- Network Marketing
- Any other industry

100% compatible with Android

System benefits:

- **Cost Savings - Eliminate costs associated with paper-based forms.**
- **Faster Forms Distribution - Distribute mobile forms to any handheld wirelessly.**
- **Gain Productivity - Less time capturing and transferring data means more time on the job.**
- **Improved Data Accuracy - Smart forms along with automatical navigation, syntactic and logic control, mean fewer opportunities for error.**
- **Faster Results - Aggregate data from multiple endpoints into existing databases and export them into external formats for further processing.**
- **Efficient Control of mobile staff activities.**
- **Efficient Work with distributed network of mobile workers regardless of covered area.**

Mobile staff can use this solution on Palm/Pocket PC handhelds or notebooks/Tablet PCs. Practically any communication modes for data synchronization are supported (e.g., landline modem, GSM modem, network card or wireless network card).

- **Ability to control your mobile staff**
- **Market, sociological and othersurveys: fast and reliable**
- **Efficient and unnoticeable inspections**
- **Mobile order taking and transfer to the central office**
- **Effective use in all areas involving mobile forms entry**

DigSee SURE (SUrvey Results Entry) – innovative forms automation software by DigSee provides users with the opportunity to effectively utilize cutting-edge mobile technologies in their business processes. DigSee SURE features two components: server and client modules. Server module provides forms creation and distibution capabilities, allowing creation of even sophisticated forms effortlessly. Client module provides the wireless Android/ notebook / PocketPC/ PalM component for faster collection and transfer. Together, these components provide a complete solution for mobile data collection. Thanks to this solution, mobile staff will be able to enter inspection results, to take an order, to create a work report, to prepare an expenses sheet, to hold an interviewing or to fill in any other form/questionnaire exactly where it is necessary – on a meeting with a customer/respondent, on-the-go, at the development site etc.

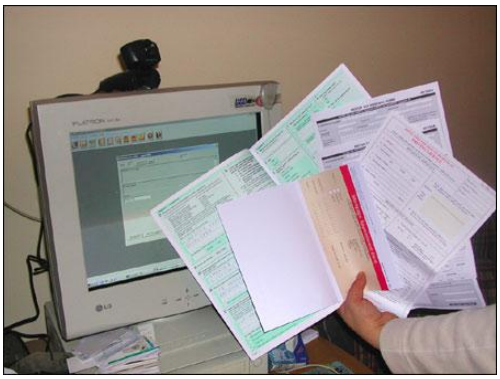

Main features of DigSee SURE:

- SURE makes possible creation of templates and data input for any forms, reports, and questionnaires. The information scope (number of forms) is limited only by the available resources of one's PC.·
- SURE provides convenient tools for data editing and takes advantages of powerful navigating through the form arrays.
- SURE is equipped with means of a syntactical and logical control of forms entry.
- SURE allows simultaneous input by several operators.
- SURE provides a possibility of aggregated data export into SPSS, Microsoft Access, and Microsoft Excel.
- SURE smoothly integrates with existing in-house systems.
- SURE operates in the unified Microsoft Windows environment.

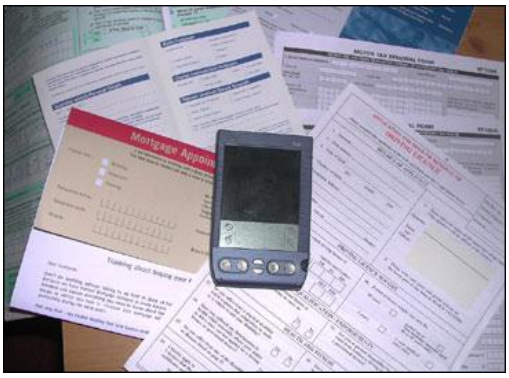

DigSee SURE allows to:

- Quickly and easily create any form/qustionnaire template;
- Distribute created form templates among mobile workers in minutes by downloading them to Palm/Pocket PC handhelds on-site or remotely;
- Fill in form/questionnare directly during a conversation with customer/respondent and transfer it to office immediately;
- Effectively organize forms entry on multiple office workplaces through local Intranet network;
- Organize distributed forms input at (geographically) remote workplaces, in remote departments;
- Store collected data in centralized database, conveniently search through that database and easily edit stored data arrays;
- Export collected data for further processing with MS Office (Excel, Access) or other applications.
